

To
Computer

I don't have a BIT90 so I'm basing
DIN power socket pinout on the Mean
Well GP25A13A-R1B tri-voltage
power supply.

Pin 1 = ground
Pin 2 = ground
Pin 3 = +5VDC
Pin 4 = -5VDC
Pin 5 = +12VDC

Power Adaptor Requirements
+5V ... 900mA
+12V ... 300mA
-5V ... 100mA

Computer Power Dissipation
+5V ... 600mA
+12V ... 200mA
-5V ... 20mA

From
Power
Adaptor

Based on original schematics from BIT Corporation
From Sheet 6-4
